

2-Up

The original general purpose plastic kayak for 2 people, Made in Australia

The 2-Up is a general-purpose kayak suitable for use by one or two adults, or one adult and 2 children (up to the total weight capacity).

The long, flat hull and moulded-in skeg give smooth and effortless paddling, whilst the dual seating positions make the 2-Up so versatile! The front seat can be fixed in either a forward or middle position, depending on the seating requirements of the crew.

Perfect for day trips or exploring waterways around your camp site, the 2-Up is the preferred choice of older paddlers. It allows access to beautiful waterways and at only 26 kilograms, it is much lighter and easier to lift than a canoe. Some people have even found that they can do it on their own!

The 2-Up is exceptional value for money as it can be used as a single or multiple person craft.

It allows you to go paddling on your own, with a mate or with a couple of kids – whatever your requirements, the 2-Up can do it all!

Specifications

Length	4 metres (13'11")
Width	77 cm
Depth	32 cm
Cockpit	55 x 210 cm
Weight	26 kg

Maximum Weight Capacity:
210 kilograms
(depending on water conditions)

Paddler Profile:
Beginner to Experienced
Children to Adults

Recommended for the following water types:

- ▼ Paddle leash
- ▼ Dry Bags

good clean fun™

11 reasons why the **2 Up** is the best value general purpose plastic kayak for 2 people Made in Australia

- 1** The wide, flat hull provides superb stability. High water clearance combats the wake from passing motorboats.
- 2** A moulded-in skeg at the rear of the hull helps the 2-Up run easily in a straight line.
- 3** The seats are contoured for comfort!! The front edge has a long, soft and gradual profile that eliminates pressure at the back of the thighs, so that you can paddle (and fish) for hours in absolute comfort.
- 4** Flexible Seat Positions. Whilst the rear seat is permanently fixed, the front seat can be fixed forward (2 adult paddling) or moved to the middle position (when used by one adult, or to evenly distribute the weight when an adult takes 2 children out in the 2-Up at the same time).

- 5** The backrests are angle adjustable and cradle the lower back, giving maximum support and comfort.
- 6** Folding the backrest of the rear seat forward allows access to the generous storage space in the rear of the hull. Excellent for storing tackle or food and drinks.
- 7** The 2-Up has a large single cockpit that is extra wide and long. People with restricted range of movement will find it easy to get into and out of the 2-Up. The large single cockpit allows for the flexibility of the dual seating positions.
- 8** A flat block moulded into the front deck of every 2-Up provides a convenient position to mount your fishing rod holder.
- 9** Urethane buoyancy is securely fixed in each end of the 2-Up as additional floatation for safety.

- 10** The footrest gives a firm bracing platform for maximum paddling efficiency. In the forward position, the front seat has a "Rail and Peg" footrest assembly that quickly and easily adjusts to suit people with different leg lengths. The person in the rear is able to brace on the back of the front seat.
- 11** Moulded hand toggles are located at each end of the 2-Up to make two person carrying comfortable and easy.
