

# Canoes, Kayaks & Sit-on-tops for Fishing

**Made in Australia :: UV Stabilised Materials :: Huge range of Accessories**

Open up a new world of possibilities for fishing, diving, crabbing and prawning. Whatever you are looking to catch, an Australis watercraft can help you to do it better and more easily.

A canoe or kayak (sit-in or sit-on-top) allows you to get into areas not easily accessible in larger, bulkier motor boats. An Australis watercraft safely and easily navigates the shallowest of waterways, allowing you to get close to rocks without fear of expensive damage and, because there is minimal noise, it provides you with the perfect platform to silently move into position.

As our canoes & kayaks can be easily transported on the roof of a car, more options open up by allowing you to launch at your favourite beach, headland, river, lake, back creek or rock platform. You don't need a boat ramp &, because you don't require a trailer, there are no annual fees for trailer and boat registration or additional costs for fuel.

Experience worry free fishing by not being reliant on a high tide to launch or retrieve a large boat, and be more flexible by fishing when you want, not just when the tide will allow... if the fish are biting, you can stay on the water without worry. Because a kayak can easily be handled by one person, you are not dependant on someone else to get on the water - simply throw the kayak in the back of a ute or on top of your car and go out for a quick spot of fishing... you will be back before you know it, & with a lot less cleaning to do (no washing down of motors).

Fishing from canoes and kayaks offers versatility for you and your mates. Australis have a range to suit a crew of 1 (any of our single person craft) up to 3 (with the Swagman or Bushranger 3 seater) and, if more people want to go, just put some more craft on the water. Those without their own craft are not left out, as canoes & kayaks can also be hired for the day, a weekend or a week. Small craft like canoes and kayaks allow everyone to enjoy fishing together, but to arrive and leave at times convenient to them, without interrupting the other anglers.

More affordable and versatile than a traditional motor boat, with the widest range of watercraft options & accessories to choose from, you can experience the freedom of fishing from an Australis canoe, kayak or sit-on-top today.

**Made in Australia**

**10 Year Warranty**

**Sit-on-top kayaks** offer great versatility as you can use them on lakes, bays and estuaries, but they are most suited to the ocean. When on the coast, you are able to launch off a beach, go through the waves and fish just outside the back of the waves for flathead. Alternatively, they can be used as a diving platform, allowing you to paddle to your preferred location, rather than having to swim there. You can either tether your craft and use it as a guide point to swim back to, or trail it behind you as you dive.

<p><b>Ocky</b></p> <p>Our smallest and lightest sit-on-top, the Ocky is stackable for easy storage and transportation. Perfect for those who need a good carrying capacity but have limited space.</p>	<p>Length: 2.7m          Width: 78cm          Weight: 16kg          Capacity: 110kg          Use on: Flat water to surf</p>	<p><b>Fishing Package</b></p> <p>Ocky sit-on-top kayak          1 x Australis deluxe back rest          1 x Powerblade double paddle          1 x paddle leash          2 x fixed rod holders          1 x adjustable rod holder          1 x 1.5 litre pod          1 x front deck bungy storage          1 x cargo strap (factory fitted)</p> <p>Price: \$ _____</p> <p><b>Upgrade with:</b>      <b>Upgrade with:</b>          1 x Utility box      1 x Rod box          Price: \$ _____      Price: \$ _____</p>

Pelagic seat well

All Australis canoes, kayaks & sit-on-tops are designed and made in Wollongong NSW. All models are on display in the retail showroom that was developed as part of our custom built factory expansion.

Years of practical paddling experience in local conditions and an in-depth knowledge of the rotational moulding process means that we can confidently call Australis the leading brand of plastic canoes and kayaks available in Australia in terms of quality and performance

## Lynxx

Flexible seat positions mean the Lynxx can be used as a single, double or triple. A large central hatch accesses an internal storage area with sufficient space for your day trip requirements. Stackable for easy storage and transporting.

Length: 4.0m  
Width: 84cm  
Weight: 28kg  
Capacity: 230kg  
Use on: Flat water to surf

### Fishing Package

Lynxx sit-on-top kayak  
2 x Australis deluxe back rests  
2 x Powerblade double paddles  
2 x paddle leashes  
2 x adjustable rod holders  
2 x 1.5 litre storage pods

Price: \$ \_\_\_\_\_

Adjustable rod holder for front & rear angler

Optional triple backrest set up

## Cuttlefish

A dedicated tandem sit-on-top with large hatches that allow access to the internal storage at the front and rear and has enough space for overnight or weekends trips.

Length: 4.3m  
Width: 80cm  
Weight: 28kg  
Capacity: 260kg  
Use on: Flat water to surf

### Fishing Package

Cuttlefish sit-on-top kayak  
2 x Australis deluxe back rests  
2 x Powerblade double paddles  
2 x paddle leashes  
2 x fixed rod holders  
1 x adjustable rod holder

Price: \$ \_\_\_\_\_

### Upgrade with:

2 x 1.5 litre pods

Price: \$ \_\_\_\_\_

Adjustable rod holder for front angler

Fixed rod holders for rear angler

John and David made their first fibreglass canoes and kayaks in the mid 1960s, as Scouts and continued to do so through the 1970s and 80s as members of the Illawarra Canoe Club. In 1984, after numerous requests by friends, and after being "down-sized" by big business they started making fibreglass canoes and kayaks commercially and sold them from the original shop front on the Princes Highway in Woonona.

In 1987, with demand for their canoes and kayaks exploding, they converted the manufacturing processes to the speedier "rotational moulding" and began making all the canoes and kayaks in the more robust and durable polyethylene.

From humble beginnings, the company is proving to be a true success story. Australis Canoes has not only survived against larger competitors from overseas, but has thrived and grown to be the largest plastic rotational moulder of canoes and kayaks and sit-ons in Australia.
