

Canoes provide the greatest area for cargo and crew and are perfect for overnight or weekend fishing trips that require you to take camping gear as well. With the addition of the Australis double outrigger kit, you are able to stand up to cast or land that big fish. Although great on rivers and lakes, canoes are not suitable to use on the ocean.

**** Australis Canoes recommends that motor sizes of 2.5Hp petrol and 28-36 pound electric not be exceeded as the Bushranger and Swagman have a maximum "hull speed" that can be achieved with motors of these sizes. Exceeding these recommended motor sizes will not make the canoe travel any faster and may actually cause it to become unsafe.**

Bushranger

A semi-enclosed canoe, the Bushranger is available with 2 or 3 seats, and can be upgraded with the third seat at a later date.

Suitable to use on flat water and small rapids, it is ideal for fishing and camping expeditions where you need a standard sized canoe that can take a lot of gear.

Length: 4.3m
Width: 85cm
Weight: 36kg (2 seats)
43kg (3 seats)
Capacity: 260kg
Use on: Flat water to small rapids

Lashing eye backrest attachment

The owners and designers of Australis are brothers David and John Slattery.

They have over 100 years of combined paddling experience & are still active paddlers who regularly paddle the coastline of Wollongong and the NSW South Coast.

John and David are experienced in numerous paddling disciplines including flat water and white water touring, sea kayaking, canoe polo, surfing and marathon racing. They have paddled many rivers and coastal regions throughout Australia and were quite competitive in their younger years, especially in marathon racing and canoe polo.
